## **IDROGAS, qualità e innovazione dal 1940**

Una lunga esperienza, garanzia di qualità del prodotto ed affidabilità del servizio. Creatività, competenza tecnica ed intuizione: caratteristiche maturate e cresciute nel corso di questa lunga storia imprenditoriale che hanno permesso ad IDROGAS di attraversare questi anni da protagonista del settore degli accessori lavello. L'ampia gamma di prodotti IDROGAS sviluppata per rendere pratico, igienico e confortevole l'utilizzo del lavello nasce da una progettazione sensibile alle esigenze del mercato, attenta alle problematiche dell'ambiente e nel rispetto delle normative in continua evoluzione. La componentistica è interamente prodotta in Italia con attrezzature di nostra proprietà e l'assemblaggio realizzato dal nostro personale, altamente qualificato da anni di esperienza e formazione, presso il reparto di produzione e confezionamento, dove il binomio qualità e convenienza è realizzato anche grazie ad un importante livello di automazione dei processi.

Nel 2008 Idrogas entra a far parte del gruppo di prodotti Demolli® Srl, azienda leader del mercato per la produzione di articoli casalinghi ed accessori per la tavola in plastica ed in legno.

### **Qualità, normativa, certificazioni e ambiente:**

IDROGAS, da sempre attenta al rispetto di severi parametri qualitativi e dei requisiti normativi previsti dal campo di applicazione dei propri prodotti, garantisce l'utilizzo di materiali conformi alle normative vigenti ed idonei per l'utilizzo per il quale i propri prodotti sono destinati.

IDROGAS sottopone periodicamente una selezione dei propri rompigetto a test presso laboratori indipendenti per verificarne l'idoneità al contatto con acqua destinata ad uso umano secondo il regolamento previsto dal decreto 6 aprile 2004 n.174.

---

### **IDROGAS, quality and innovation since 1940**

A long course experience to guarantee quality of products and reliability of services. Creativity, technical competence and intuition: characteristics which have grown and evolved during the long intrapreneural activity of IDROGAS. During these years, the company has played as one of the leaders in the production of accessories for sinks and wash basins. The vast spectrum of available IDROGAS products has developed in order to make the use of wash basins practical, hygienic and comfortable. The product offer originated from a close design kept close to the market needs, weary of ambient restrictions, and respectful of ever changing norms.

Components are entirely produced in Italy with self owned machinery, and assembly done by our highly qualified workers, with years of experience and training. Components are produced in the production and packaging section, where quality and convenience is achieved using a distinct level of process automation.

During 2008 IDROGAS has been absorbed by Demolli® Srl group of products, a leading company in the production of household products and dining table accessories in plastic and wood.

### **Quality, Legislation, certification and environment:**

IDROGAS has always been keen to meet quality goals and legislative certification for all its products. The company can easily guarantee prime materials used for its items, and certify they are in line with severe quality standards requested for the specific applications they are destined for.

According to actual regulations, namely n. 174 dated April 6th 2004, IDROGAS undergoes regular periodic tests on its jet-breakers to confirm the corresponding suitability with water intended for human use.

## **Certificazioni A.C.S. (Attestazione Conformità Sanitaria)**

IDROGAS è in grado di offrire una ulteriore testimonianza a garanzia della qualità dei propri progetti. Nonostante l'appartenenza all'Unione Europea, anche in ambito di normative sanitarie, molti paesi appartenenti prevedono regolamenti nazionali prevalenti rispetto a quelli comunitari.

IDROGAS, in quanto produttore di rompighetto, per esportare i propri prodotti in Francia, ha sottoposto un'ampia selezione dei propri rompighetto alle severe verifiche previste dall'ordinanza 29/06/1997 modificata e circolare Ministero della Salute Francese DGS/SD7A nr.571 25/11/2002 ottenendo, per tutti gli articoli proposti, l'Attestazione di Conformità Sanitaria (A.C.S.) indispensabile ed obbligatoria dal 01/01/2007 per la commercializzazione in Francia di prodotti a contatto con acqua destinata a consumo umano. Verifica documentale sulle composizioni delle materie prime utilizzate e test sui prodotti sono stati eseguiti presso CARSO L.S.E.H.L. (Laboratoire Santé Environnement Hygiène de Lyon), uno dei quattro laboratori accreditati dal Ministero della Salute Francese per il rilascio di questa attestazione.

## A.C.S. (Health Conformity Certification)

IDROGAS can further warranty quality of its own design. Many countries have to abide to local stringent legislation regarding health and safety norms. These can be even more severe than the EU laws they already make part of.

IDROGAS produces jet-breakers, and in order to export its products has to conform to very severe verification with respect to the 29/06/1997 modified Ordinance and French circular Ministry of Health DGS/SD7A nr.571 25/11/2002. IDROGAS has obtained for all products the certification of health conformity (A.C.S.), essential and mandatory since 01/01/2007 to be able to sell products in contact with water for human use in France.

Document verification on material composition and tests have been carried out at CARSO L.S.E.H.L. (Laboratoire Santé Environnement Hygiène de Lyon), one of four laboratories accredited by the French Ministry of Health to certify these type of products.

## Certifications A.C.S. (Attestation de Conformité Sanitaire)

IDROGAS est capable d'offrir autres témoignages pour garantir la qualité de leurs projets. Malgré appartenir à la UE, aussi dans le domaine de la réglementation sanitaire, plusieurs pays sont soumis à des réglementations nationales qui prévalent sur celles de la Communauté.

Idrogas en qualité de fabricant d'aérateurs et brise-jets, pour exporter ses produits en France, a soumis une large sélection de ses aérateurs et brise-jets aux contrôles stricts prévus par le règlement 29/06/1997 modifiée et par la circulaire du Ministère de la Santé Français DGS/SD7A nr.571 du 25/11/2002 obtenant, pour tous les articles proposés, l'attestation de Conformité Sanitaire (A.C.S.), indispensable et obligatoire à partir du 01/01/2007 pour la commercialisation en France de produits en contact avec de l'eau destinée à la consommation humaine.

La vérification documentaire de la composition des matières premières utilisées et les tests des produits ont été réalisés auprès de CARSO L.S.E.H.L. (Laboratoire Santé Environnement Hygiène de Lyon), l'un des quatre laboratoires accrédités par le Ministère Français de la Santé pour la délivrance de cette attestation.

## Ambiente e risparmio

Incremento demografico ed utilizzo sempre meno responsabile delle risorse, in assenza di politiche internazionali idonee, porteranno nel prossimo futuro il nostro pianeta verso un'inevitabile emergenza idrica con risvolti particolarmente drammatici in alcune parti del mondo. Per questo diventa necessario ripensare all'acqua non più come risorsa infinita, bensì esauribile e preziosa. Ridurre lo spreco dell'acqua vuol dire abbassare i costi economici ed ambientali, non solo dell'acqua, ma anche dell'energia e delle emissioni collegate (trasporto e riscaldamento)

IDROGAS, da sempre sensibile alle problematiche legate all'ambiente, con i suoi rompigetto aerati propone una semplice soluzione per contribuire alla riduzione del consumo di acqua senza modificare le proprie abitudini. Questo dispositivo, miscelando acqua e aria, aumenta il volume dell'acqua fuoriuscita dal rubinetto generando un getto morbido, con un maggiore potere lavante. Quindi, a parità di effetto, minore acqua consumata. Inoltre tutti i rompigetto IDROGAS possono essere dotati di economizzatore, un dispositivo che limitando il passaggio di acqua, riduce ulteriormente il consumo di acqua senza modificare il comfort dell'utilizzatore.

## Environnement et économie

The demographic increase and the ever increasing waste of resources, without an adequate international policy, will inevitably drag us into a water shortage emergency, with particular dramatic scenarios in some parts of the world. It must therefore be mandatory to think of water not as an endless resource, but yet as a precious and potentially ending prime wealth. Reducing waste of water means reducing costs and environmental impact, not only of water itself but also energy and emissions associated with transport and heating. The company has always been very sensitive to the preservation of our environment, and with its air jet-breakers it offers a solution which definitely contributes to water saving without any significant change to personal habits. The jet-breaker mixes air and water increasing the volume of water coming out of the tap, with the result of a comfortable soft jet with increased cleaning potential. IDROGAS Jet-breakers means keeping the same washing effect, with less waste of water. Furthermore, all IDROGAS jet-breakers can be combined with an economizer which further reduces the use of water, though keeping the same comfort and effect for the end user.

## Francese

La croissance démographique et l'utilisation moins responsable des ressources, en l'absence de politiques internationales appropriées, mèneront dans un proche avenir, notre planète à une urgence hydrique inévitable avec des conséquences particulièrement dramatiques dans certaines parties du monde. Pour cette raison, il devient nécessaire de repenser l'eau non plus comme une ressource infinie, mais épuisable et précieuse. Réduire le gaspillage d'eau signifie réduire les coûts économiques et environnementaux, pas seulement l'eau, mais aussi l'énergie et les émissions associées (transport et chauffage)

IDROGAS, toujours sensible aux problèmes environnementaux, avec son aérateurs offre une solution simple pour contribuer à la réduction de la consommation d'eau sans changer leurs habitudes. Cet appareil, mélangeant de l'eau et de l'air, augmente le volume d'eau qui va sortir du robinet en générant un jet doux avec un pouvoir de lavage supérieur. Par conséquent, avec le même effet, moins d'eau consommée. En outre, tous les brise-jets IDROGAS peuvent être équipés d'un économiseur, un dispositif qui, en limitant le passage de l'eau, réduit encore la consommation d'eau sans modifier le confort de l'utilisateur.

Aerators  
Aérateurs  
Belüfter

**AERATORI**

## Aeratori Idrogas con limitatori di portata

Gli aeratori Idrogas sono prodotti ad alto contenuto tecnologico e progettati in modo da prevenire la formazione del calcare. La particolare conformazione del circuito di passaggio dell'acqua attraverso un insieme di retine e riduttori limita la portata dell'acqua ad un massimo di 8 lt/minuto, contro i 15 potenzialmente erogati da un rubinetto privo di limitatore di portata, senza modificare il comfort dell'utilizzatore.

I nuovi aeratori Idrogas sono realizzati interamente in acetica, una particolarissima resina che, per le sue caratteristiche di assoluta impermeabilità, è in grado di ritardare notevolmente la formazione di calcare rispetto ai normali aeratori con retina metallica. Non solo: la particolare forma della retina posteriore, che ha una superficie superiore del 30% rispetto alla retina dei normali aeratori, consente di ridurre la formazione di depositi anche nel condotto di ingresso dell'acqua. Mantenere efficiente l'aeratore è ancora più semplice grazie all'innovativa chiave di servizio che, oltre ad agevolare montaggio e smontaggio del dispositivo, la chiave, realizzata in tecnopolimero ha una estremità realizzata in modo da essere inserita nelle feritoie di aerazione e di passaggio dell'acqua e frantumare i residui con una lieve pressione e rotazione senza la necessità di smontare l'aeratore e di utilizzare prodotti chimici aggressivi per la ghiera cromata.

## Idrogas aerators with flow limiter

These are high technology products, specifically designed to prevent limestone deposits. The water passage has been closely designed to go through a network of fine matrices and passages to limit the flow to 8 ltr/min, compared to a normal 15ltr/min flow in a common household tap, without any modification for the user comfort.

The new Idrogas aerator is made of Acetal, a particular resin which, due to its chemical structure, can significantly slow down the limestone build up compared with a metallic net. Furthermore, the particular design of the rear matrix, which displays an extra 30% area with respect to a metallic traditional one, and is also capable of reducing deposit build-up in the inlet part of the tap.

Efficient maintenance of the aerators is even easier, with an innovative technopolymer tool, which makes disassembly and reassembly easy and quick. The tool has a special fork which can be inserted into the Aerosol slots and water passages, then with a slight pressure and rotation of the tool, it can fragment lime build up without having to disengage the aerosol. There is no need to use aggressive chemical liquids to remove build up like with chrome containers.

## Aérateur Idrogas avec limiteur de débit

Les aérateurs d'Idrogas sont des produits de haute technologie conçus pour empêcher la formation de calcaire. La conformation particulière du circuit de passage de l'eau à travers un ensemble de rétines et de réducteurs limite le débit d'eau à un maximum de 8 litres / minute, contre 15 potentiellement alimentés par un robinet sans limiteur de débit, sans modifier le confort de l'utilisateur.

Les nouveaux aérateurs Idrogas sont entièrement fabriqués en acétal, une résine très spéciale qui, en raison de ses caractéristiques absolues l'imperméabilité, il est capable de retarder considérablement la formation de calcaire par rapport aux aérateurs normaux à rétine métallique. Pas seulement: la forme particulière de la rétine postérieure, qui a une surface supérieure de 30% à celle des aérateurs normaux, permet de réduire la formation de dépôts même dans le conduit des conduits d'entrée d'eau.

Garder l'aérateur efficace est encore plus facile grâce à la clé en technopolymère de service pratique qui va à faciliter le montage et le démontage de l'appareil; avec une extrémité spéciale pour être insérée dans les fentes de ventilation et de passage de l'eau. Avec une légère pression et rotation de la clé, sans démonter l'aérateur et sans utiliser produits chimiques agressifs sur l'écrou chromé.

## ECONOMIZER Line

**Aeratori in ottone cromato** **con economizzatore 12L/min.**

**Chrome-plated brass aerators with water economizer 12L/min.**

**Aérateurs en laiton chromé avec économisateur 12L/min.**

**Messing verchromte Belüfter mit Economizer 12L/min.**
